Wittemyer Courtroom

How to Connect Your Laptop or Document Camera

Wake up the controller

Locate the remote on the podium. Touch the screen to wake the control panel.

3

Turn on the projector and lower the screen

Touch Menu at the top of the screen.

into your laptop

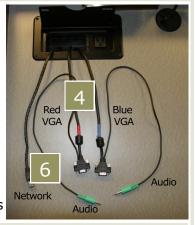

Touch On for the desired projector. Touch Down to lower that projector's screen.

Connect your laptop/document camera to the projector

Yellow, Purple, Red, Blue, Green, or Orange

- Look on the back or side of your laptop.
 - * Mac users need to use a VGA adapter.

Attach the cable to the cable port.

* For the document camera, select one of the VGA-out ports.

Select any VGA cable from the podium or floor boxes to plug

Want to play sound from your laptop?

- Connect the green audio cable from the VGA cord to your laptop's headphone jack (a.k.a. **speaker-out**).
- Press the projector location you're using (Left, Center, Right). Then press the Laptop button
- Touch the color that matches your selected VGA cable

Wait a few seconds for your laptop's image to appear on the projector screen. You're ready to qo!

To adjust the courtroom lighting, touch *Lights* at the top of the screen; then try any preset button

Preset 3 Preset 4

Off

to the Duplicate/Mirror setting: The command differs by brand

Use the appropriate keyboard command below to get

Send the signal from your laptop

Dell: Fn + F8Toshiba: Fn + F5 IBM/Lenovo: Fn + F7

Other PCs: Fn + F key with

CRT/LCD or

Mac: Go to Apple Menu \rightarrow System Preferences \rightarrow Displays \rightarrow Arrangement. Select the Mirror Displays check box.

An image like this will appear on your screen:

Select **Duplicate** using the \rightarrow key; then press **Enter**.

How to Play a DVD, AV Troubleshooting, & System Shut Down

Play a DVD using your laptop's DVD player

- 1. Connect your laptop to the AV system (see other side).
- 2. Insert the DVD into the drive and wait for the media player to start.
- 3. Click the "Play" icon on the media player's control panel.

If what you're projecting doesn't fit optimally on the screen, try this...

- 1. Right-click anywhere on your desktop screen.
- 2. The drop down menu pictured right will show up. Select **Screen resolution**.

 The window pictured left will open. Click on the resolution drop down, then drag the arrow to 1280 x 800 or 1280 x 768.

You may need to try both to see how they look and choose the better of the two.

- 4. Click anywhere off of the sizing window to close it.
- 5. Click **OK**.
- You'll be asked, "Do you want to keep these display settings?" Select Keep changes.

Wait a few seconds to see the changes.

Once you disconnect from the classroom AV, your laptop should return to its optimal resolution. If it doesn't, you can repeat these steps except move the resolution arrow to a higher setting.

If you can't hear audio, check the following ...

- The green audio cable from the VGA cord is plugged into your laptop's headphone jack, NOT the microphone jack
- Your laptop speakers and the classroom speakers are NOT on mute
- Try adjusting the volume from your laptop or from the wall console as pictured to the right

Shut down the system when you're done

- 1. Touch **Menu** at the top of the screen.
- 2. Touch the **Off** button to power down the projector.
- 3. Touch the black **Up** button to raise the screen.
- 4. Return the remote to the base to recharge (Look for CHG).

Thanks for turning off the lights too!

- Touch the **♦** and **♦** buttons
- To mute, touch the **Mute** button
